JPEO JTRS to Release the SCA Next Draft v1.0.0.2 Specification, Appendix C & Errata

SAN DIEGO – The Joint Program Executive Office for the Joint Tactical Radio System (JPEO JTRS) is announcing the upcoming Software Communications Architecture (SCA) Next v1.0.0.2 release. The upcoming release will focus on enhancing the clarity and consistency of the draft specification. The release is scheduled for mid-August and represents the next iteration in the transition of SCA Next from a draft to a finalized specification. SCA Next is scheduled to be finalized by December 2011.

The current Specification is available for download from the JPEO JTRS Software Communications Architecture (SCA) website at <http://sca.jpeojtrs.mil/scanext.asp>.

SCA Next validation is a key component of the finalization process. There are several activities underway and the outputs from those initiatives will provide empirical evidence to confirm the new architectural features introduced in this version of the spec.

SCA Next users are encouraged to report implementation activities and experiences to JPEO JTRS Standards at jtrs-sca@spawar.navy.mil. Feedback from users and implementers will help shape the content and priority of future SCA releases.
